 (54) 375562-9953

 Córdoba, Córdoba, Argentina

PROFESSIONAL PROFILE

Backend Developer with experience in Java and Spring Boot, focused on building REST APIs and working with relational databases. Passionate about backend architecture, automation, and scalable systems. Recently expanding into AI-driven solutions, developing agent-based workflows and automation pipelines using modern AI tools. I enjoy solving complex problems and continuously learning new technologies, and I am currently seeking opportunities where I can contribute to backend and AI-powered systems while growing professionally.

EDUCATION

**Digital House, Globant
y Mercado Libre**
Certified Tech Developer
2022 - 2024

**Digital House, Globant
y Mercado Libre**
Backend Specialist
2024-2025

SOFT SKILLS

- Teamwork
- Flexibility
- Proactive
- Learning

PORTFOLIO

LANGUAGES

- Spanish — Native
- English — Basic
- Portuguese — Fluent (spoken)

PROFESSIONAL EXPERIENCE

Back end Developer

Contributed to the backend development of a web platform for car rentals. Responsible for implementing the business logic, designing the database structure, managing security, and developing the server-side functionality from scratch.

Repository:

<https://github.com/facuscholze/World-Car-Rental-Back-End>

AI Agent Automation Project

Designed and implemented AI agent workflows to automate tasks and integrate APIs using CrewAI and workflow orchestration tools. Built systems capable of processing user inputs, structuring data, and triggering automated actions through intelligent agents.

TECHNICAL SKILLS

Back End & Front End

Object-Oriented Programming (OOP), Java, Spring Boot, REST APIs with Spring Boot, Spring Security, Hibernate, HTML, CSS, JavaScript, React, Relational Databases (MySQL), Docker, UX/UI, API Consumption (Postman), AI Agents orchestration (CrewAI), Workflow automation (n8n), LLM integration, Prompt engineering, AI-powered automation pipelines.

DATA BASE

Relational Databases, MySQL, MySQL Workbench, Stored Procedures, SQL Queries, Database Modeling, ORM (Object-Relational Mapping), Database Best Practices and Optimization.

Infrastructure

Infrastructure as Code (IaC) (Terraform, Ansible, CloudFormation), CI/CD (Continuous Integration and Continuous Delivery) (Jenkins), Monitoring, Networking, Network Operating Systems (Windows/Linux), Cloud Computing (AWS), Virtualization (VirtualBox, Vagrant), Containers (Docker), Scripting (Bash, PowerShell).

QA

Requirements Document Analysis, Defect Reporting, Analysis, Design and Implementation of Test Cases, Functional Testing, Smoke Testing and Regression Testing, Web Service Testing (Postman), Black-box and White-box Testing, Debugging, Unit Testing (JavaScript).
